Welcome to Classical Gas

At Classical Gas we have built our business over many years by providing a reliable and competitive service using quality products.

Full range of services

We offer the full range of services for all your central heating, gas fitting and plumbing needs, with the emphasis on good quality workmanship coupled with energy efficiency, using only the latest technology boilers and appliances from reputable manufacturers.

State of the art showroom

We have recently acquired showroom and office premises, offering you the opportunity to come and view a range of brand name boilers. Also on show is a selection of stunning designer radiators from leading manufacturers together with a working state of the art solar panel hot water system which is open to view.

Fast response time

We are also able to offer a fast response time for emergency repairs and a complete service for landlords including gas reports and safety certificates.

Classical Gas Care Plan

In response to our customers, we launched a new service during the summer of 2009, to offer a service and maintenance scheme which could be paid monthly or annually in advance and would cover all eventualities following a failure of heating or hot water.
