

Park Lane Dev.

Park Lane Development - updated 28/4/16

This development will be discussed at a forthcoming Planning Meeting on May 5th in Beverley.

=====

At a Cottingham Parish Council Planning Committee Meeting held on the 4th November the proposed development was again rejected.

On a unanimous decision the Cottingham Parish Council Planning Committee strongly objected to this application on the following grounds:

• The site had been ejected in the emerging ERYC Local Plan as it was within Source Protection Zone 1 and development could compromise the integrity of the local groundwater sources. It also intruded into the open countryside

• The site was outside the building development limit set out in the Beverley Borough Plan

• The site regularly flooded and the attenuation proposed by the developer would be inadequate

• General flooding and drainage concerns, including who would maintain any systems once the development was sold on

• Sewerage issues " where would it go as Cottingham sewers are already up to capacity as evidenced by the overflow of sewerage into gardens in numerous locations during recent periods of heavy rain

• Inadequate provision for cars

• Highway safety would be compromised by increased traffic both on Park Lane itself and at the access onto Northgate

• The development was against the emerging Neighbourhood Plan

• The Committee feel very strongly that no development should take place until the necessary infrastructure improvements that Cottingham needs have been put in place.

• Should the ERYC Planning Officer not agree with the Committee's decision then it was agreed that this application should go before the ERYC Planning Committee.
